

SuperX All-in-One Multi-Model AI Server

Revolutionize Your Business Efficiency

The All-in-One Multi-Model AI Server provides enterprises with ready-to-use and continuously updated AI office capabilities through a built-in multi-modal model library and cloud-based image repository. It integrates NVMe with CPU/GPU collaborative acceleration, along with independent storage and data isolation, ensuring high efficiency, security, and stability of AI services. Additionally, with an all-scenario office chatbot and a performance observability platform, it offers a one-stop solution to boost enterprise productivity and maintain performance visibility under high concurrency.

Product Highlights

Integrated Model Library

Pre-loaded NLP, CV models for immediate use.

Custom Model Deployment

Containerized deployment with secure private model repository

Data Security & Privacy

Robust encryption and isolated storage.

Rapid Deployment & Updates

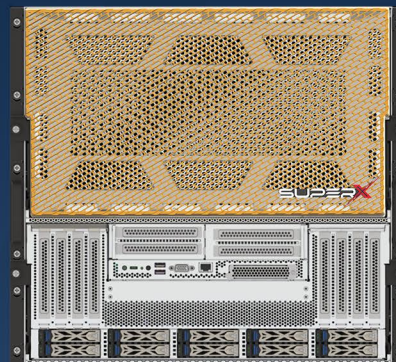

Cloud-based model synchronization with one-click updates.

Optimized Performance

NVMe + CPU/GPU acceleration.

Comprehensive Chatbot

Seamlessly integrated AI for meetings, collaboration, and knowledge management.

Marketing

Advanced NLP & CV Models for Content Creation

Sales

Real-time Data Insights

Project Management

Report Analysis and Resources Allocation

Customer Service

Smart AI Assistant and Chatbot

Admin and Human Resources

Efficient Document Automation

Suitable for all enterprise scale

Flagship Edition-XN9160

GPU8* NVIDIA HGX B200 .Total storage 1536GB . Maximum bandwidth 64TB/s			
CPUDual Intel Xeon 6th Gen Processors . Total 128 Cores		Memory	Total 3TB+
System Disk960GB SATA SSD		High-Speed Storage30TB+ NVMe SSD
